PC Tools - About Us

PC Tools™ is a global leader in innovative software products designed to protect the privacy and security of Windows® computer users. PC Tools publishes software and provides technical resources for securing, protecting and maintaining the Windows® operating system.

Our Mission

Our mission is to encourage safe, secure and stable personal computing through the development and delivery of world class software applications that are backed up by exceptional customer service.

Company Overview

PC Tools™ is a privately held company with offices located in the United States and Australia . PC Tools was originally founded as part of the WinGuides Network in 1998, before being rebranded as PC Tools in 2004. PC Tools is powered by a dedicated team of professionals from a variety of diverse, yet complementary disciplines in order to develop, publish and support leading security and system software for the Microsoft® Windows® operating system.

We are a fast growing company with dedicated R&D Teams helping us to remain competitive leaders in the products we release. In addition we run a specialized Malware research center devoted to identifying new malware definitions and threats - so our customers can rapidly and easily obtain updates to help prevent new computer infections.

Our products and services are used by millions of

Our Products
